Standup of United Aero Inc. (UAI)

United Dynamics is proud to announce the standup of our new subsidiary company, United Aero Inc. (UAI).

UAI is a Federal Aviation Administration (FAA) certified, Part 145, repair station that performs Maintenance, Repair, and Overhaul (MRO), as well as inspections on accessories for commercial and privately-owned aircraft.

UAI enters the commercial MRO sector with a well-established and deeply respected engineering and technician workforce, forged by over 30 years' experience providing engineering, manufacturing, and testing for a variety of components for Department of Defense (DoD) weapons platforms and transport aircraft; this translates to an MRO company that knows how to solve repair challenges and provide superb maintenance services.

UAI maintenance will be performed at our manufacturing facility at 41001 Wolverine Road in Shawnee, OK, with near-term plans to expand our operations to other locations within Oklahoma.

United Dynamics, located in Shawnee, Okla., specializes in aerospace and defense engineering, design, manufacturing, and Maintenance, Repair & Overhaul (MRO).
